Enercept, 3100 9th Ave SE, Watertown, SD 57201

Course Objective:

This two day workshop will cover the installation basics for Enercept SIPs.

Course Description:

There will be a mix of classroom, in-person demonstrations, and social activities.

Tuesday morning will consist of classroom instruction. Here you will learn about Enercept SIPs - what they are and how to use them. You will learn the Enercept proven process from estimate to delivery. You will learn how to unload, sort and stack your SIPs. You will learn the basics about wiring with SIPs, and HVAC sizing.

Tuesday afternoon we will tour Enercept and our EPS provider, Benchmark Foam. Following the tours you will participate in our in-person training where we will demonstrate the installation of wall panels.

We will continue the in-person training on Wednesday morning, with the demonstration of installing roof panels.

We will finish up with a light lunch and presentation of participation certificates.
